Introduction

The MB.CHARGE Public rates are governed by the maximum charging speed, for which a fast charging speed usually also implies higher costs.

MB.CHARGE Public differentiates the following charging speeds:

AC – alternating current (normal charging)
DC – direct current (fast charging)
HPC – high power charging (ultra-fast charging)

The maximum charging power capacity of each charging station can be found on the MB.CHARGE Public website and the Mercedes-Benz app.

Charging stations, which are provided for free by a charging infrastructure operator, are basically also made available to MB.CHARGE Public customers free of charge. You can conveniently filter for free charging stations on our map. Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. Please inform yourself about the valid prices in the Mercedes-Benz app before you start charging. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

You can also recharge for free using MB.CHARGE Public at free charging stations.
Currently, Germany does not guarantee nationwide coverage with charging and billing solutions conforming to calibration law by charging station operators. In our service, we use data provided by charging station operators. In some cases this may lead to deviations in charging and billing amounts, among other things. Please get in touch if you have any questions.
1) Customers who have purchased a specific fully electric Mercedes-Benz as a new vehicle are exempt from the base fee for the 3 months for MB.CHARGE Public L. Excluded from this promotion are the following vehicles: Mercedes-Benz eSprinter, Mercedes-Benz eVito and all of its derivates. For your vehicle deviating charging fees at IONITY charging stations might apply – please contact your dealer for further information. The offer is only valid for the first contract and cannot be transferred to others. After the 3 months the normal tariff conditions apply. The Mercedes-Benz promotion is automatically put into effect for 3 months when your charging contract is activated. In case you are eligible to receive this promotion, you will be automatically guided to MB.CHARGE Public L during the registration.
2) The prices displayed as "flexible prices" vary depending on the operator of the charging station and are subject to change. Additional fees, such as session fees, blocking or other time based fees, may apply at certain charging stations. The current applicable price, plus any additional fees, will be displayed at a selected charging station in the map of the Mercedes-Benz app or on the MB.CHARGE Public website and can be checked directly prior to initiating a charging session.
3) The charging service contract runs for an indefinite period of time and can be terminated by the customer at any time from the reference date of the contract, with a notice period of no more than one month.

Charging event transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected. You can also recharge for free using the MB.CHARGE Public service at free charging stations.

All rates incl. VAT, subject to changes and errors.
